Clifford Dent
Inventor of the Dent Bolt
Trinity Industries

Subject: Dent Bolt

Dear Mr. Dent:

The Exit Sign finally got hit and the Dent Bolt worked extremely well. The Dent Bolt becomes a breakaway regardless of which side the sign supports are hit. They break away from a frontal hit, as well as a side hit, thus causing little or no damage to the sign support or sign support bottoms.

If the Dent Bolt had not been installed, we would have to install new support bottoms and sign support I-Beams.

Sincerely,

Alfredo Lopez, Supervisor IV
West Area Maintenance Section

AF:rm
