PO BOX 6007  
FARMINGTON NM 87499

RE: Murphy Dr Exit

Dear Mr. Dent:

On August 2, 2001, The Texas Department of Transportation installed a sign structure using the Dent Breakaway Bolts with you present at this installation. The sign structure was on three, W-6x15, I-Beam Posts and had a sign panel of 26 ft by 10 ft. The leg height is 20 ft.

The sign structure has been installed for 2 1/2 years and there have been no problems from fatigue or wind. We have had other signs impacted using the Dent Breakaway Bolts and these have worked as designed with no post or ground anchor damage.

As the Dent Breakaway Bolt has proven to save the post and ground anchor when impacted by errant vehicles from any direction, your product helps save the state money and reduces labor costs to repair.

Should you have any questions concerning this matter, please call this office at (817)370-6674.

Sincerely,

Lynn E Haehn  
District Sign Shop Supervisor, Fort Worth
